25X1A ATTENTION:

FROM: Chief, CIA/PID (NPIC)

REFERENCE: (a) Requirement C-SI-3-80,884  
(b) CIA/PID Project C 1808-63

3. It appears as though the size and shape of the H-shaped sites (see NPIC/R-192/63 and R-193/63) would preclude deployment of the GRIFFON missile (see NPIC/R-1585/63). This is especially true when considering the necessary operation of the transporter as seen in the Moscow parade and the ground support equipment required to handle the missile. It would seem that a site with a road system similar to that of a typical SA-2, SA-3, or like those unusual SAM sites along the Polish border would be required to facilitate the operation of a transporter of this kind. The scale of the available KEYHOLE photography of the unusual SAM sites precluded any definite association of the GRIFFON missile with these sites.

5. This project is considered to be complete.
